

# Aglianico Vulture

It's a vigorous vine cultivar with an early bud burst and a late ripening period.  
 The grape production is medium and constant.  
 It gives a justly tannic, harmonious and bodied intensively ruby-red coloured wine.  
 With ageing it acquires refinement and becomes an aristocratic wine.

L'INNOVAZIONE IN VITICOLTURA

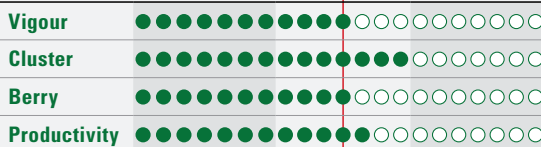

## VCR CLONES

### VCR11

Average of the cultivar

Origin:  
Venosa (PZ)

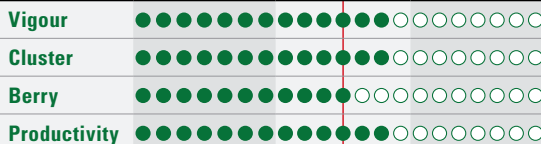

**Oenological aptitude:** this clone is suitable for long-aged wines, also in blend with other autochthonous cultivars.

### VCR14

Average of the cultivar

Origin:  
Venosa (PZ)

**Oenological aptitude:** this clone is suitable for particularly fruity and spicy medium-aged wines. The blend with VCR11 and/or with Taurasi VCR2 and VCR23 is ideal.
