

Malvasia Istriana (Istrian Malvasia)

It's a very vigorous vine cultivar, with a late bud burst and a medium ripening period. The grape production is abundant and quite constant. It gives a rather alcoholic, slightly aromatic and fine straw-yellow coloured wine with golden reflections.

L'INNOVAZIONE IN VITICOLTURA

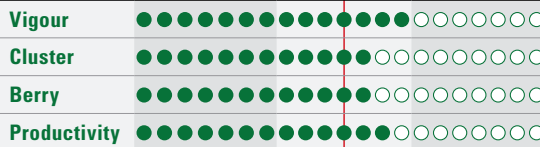

VCR CLONES

VCR4

Average of the cultivar

Origin:
Cervignano (UD)

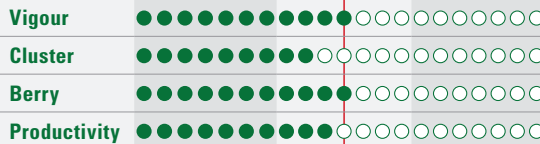

Oenological aptitude: this clone gives fresh and slightly aromatic wines with excellent structure and ageing potential.

VCR113

Average of the cultivar

Origin:
Premariacco (UD)

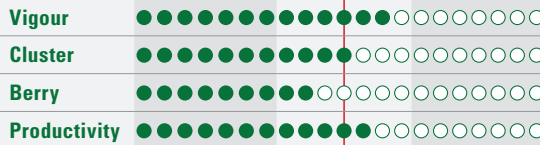

Oenological aptitude: this clone gives fruity wines with slight muscat notes, with good structure and fineness.

VCR114

Average of the cultivar

Origin:
Premariacco (UD)

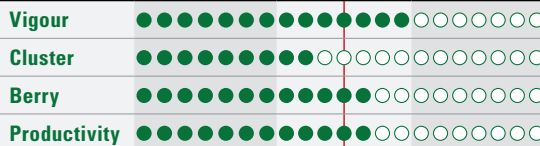

Oenological aptitude: this clone gives very fresh and well structured wines. Blending with VCR113 is excellent for young wines.

VCR115

Average of the cultivar

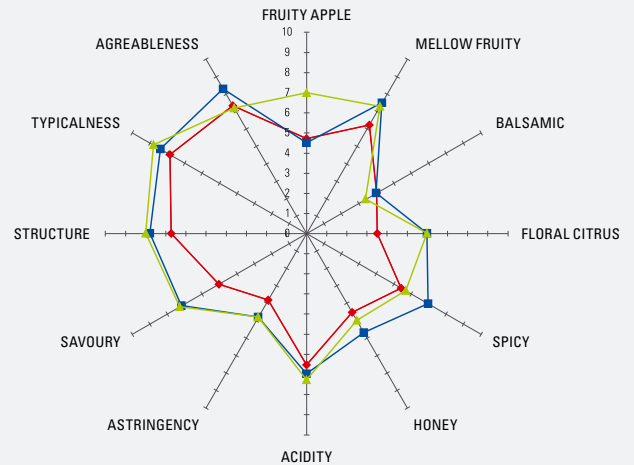

Origin:
Premariacco (UD)

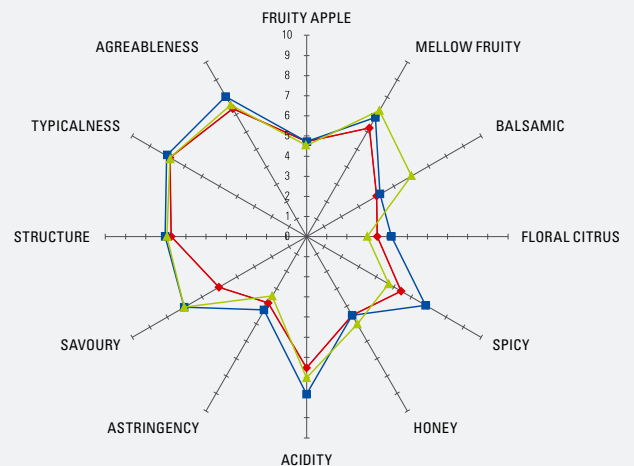

Oenological aptitude: this clone is suitable for elegant flowery-fruity wines with an excellent structure. Blending with VCR4 is very good, also for production of aged wines.
