Matilde

It's a table grape cultivar of good vigour, with an early bud burst and an early-to-medium maturation period.
The grape production is abundant and constant.
The weight of the cluster is 700-800 gr and the weight of the berry is 6-7 gr, the total acidity is 4-5‰, pH is 3,40.
The transportability is excellent, as well as the resistance to cold room storage.

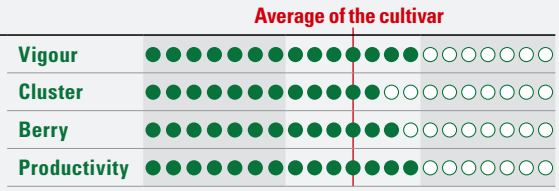
VCR CLONES

VCR15

Origin:
Trinitapoli (FG)



Oenological aptitude: this clone suffers the fall-off of the flowering buds (the so-called "acinellatura") less than the average of this cultivar and its berries are bigger.
